

NTT Communications (Thailand) Launches Software-Defined Exchange Service (SD-Exchange) To Enhance Potential of Hybrid Cloud

Bangkok: May 21, 2018 – NTT Communications Corporation (NTT Com), the Global ICT solutions and international communications business within the NTT Group (TYO : 9432), announced today that NTT Communications (Thailand) Co., Ltd. launches the latest SD-Exchange Service with Megaport, a leading Network as a Service (NaaS) provider, allowing customers in Thailand to have direct, and secure access to the world leading cloud service providers (CSPs) from NTT Com's Bangkok 2 Data Center, conveniently.

The service offers one-stop multicloud, ease of use, rapid deployment, cost efficiency and flexibility.

Mr. Masatoshi Tsuboi, Executive Vice President of Sales Consulting, Product & Service, Data Center Department, NTT Communications (Thailand) Co., Ltd. said NTT Com is now offering secured multicloud connectivity through SD-Exchange Service enabling customers to have direct and secure access to major global CSPs including Alibaba Cloud, Amazon Web Service (AWS), Google Cloud Platform, IBM Cloud, Microsoft Azure, Oracle Cloud, and Salesforce conveniently and rapidly.

"We believe that the significant growth of Cloud-based applications and Hybrid Cloud solution among Thai enterprises will drive the increasing demand of SD-Exchange Service. Today, businesses are transforming digitally, the connectivity to the cloud is essential to deliver speed-to-market, especially for companies in financial service and innovative-based industries. Taking advantage of Megaport's platform, SD-Exchange Service's offer of flexible, on-demand cloud connectivity will help them drive their revenue growth through cost control and efficiency, and most importantly, a network that matched the incredible capabilities of their cloud services," he said.

Josh Munro, Megaport's Executive Vice President of APAC, said, "Enterprises in Thailand can now benefit from NTT's deep expertise and significant data center investments with the reach and easy accessibility of Megaport's global SDN. Together we are providing access to the best cloud and hosted IT services the world has to offer. As companies increasingly move towards hybrid cloud and multicloud architectures, it is critical they have secure, scalable connectivity to ensure applications perform flawlessly."

NTT Com is rolling out SD-Exchange services with Megaport across the greater Asia-Pacific region. NTT Communication Thailand now joins NTT Singapore and NTT Indonesia with fast and direct cloud connections through the Megaport SDN.

About Megaport

Megaport is the global leading provider of Elastic Interconnection services. Using Software Defined Networking (SDN), the Company's global platform enables customers to rapidly connect their network to other services across the Megaport Network. Services can be directly controlled by customers via mobile devices, their computer, or our open API. Megaport connects over 900 customers in more than 200 data centres globally. Megaport is an Alibaba Cloud Technology Partner, Oracle Cloud Partner, AWS Technology Partner, AWS Networking Competency Partner, Microsoft Azure ExpressRoute Partner, Google Cloud Interconnect Partner, IBM Direct Link Cloud Exchange provider, and Salesforce Express Connect Partner.
