

Megaport Announces Public Availability of Megaport ONE Beta

Megaport's feature-rich networking, compute, and orchestration platform will take users through the cloud.

Brisbane, Australia – September 5, 2023 – Megaport, the global leader in Network as a Service (NaaS), is excited to announce the public availability of Megaport ONE beta. With a decade of experience connecting customers to the cloud, Megaport is now taking customers through the cloud.

Megaport's groundbreaking Software as a Service (SaaS) platform seamlessly integrates networking, computing, and orchestration into a unified interface.

"In just a few clicks, businesses can effortlessly access GPUs worldwide and efficiently manage compute resources across multiple cloud and bare metal providers, enabling the rapid deployment of AI and ML models," stated Michael Reid, CEO of Megaport.

"Megaport is committed to simplifying complexity, and with this new launch, we are offering Megaport ONE's comprehensive features to everyone, free of charge for a limited time," said Reid.

Michael emphasised the significance of high-speed computing and GPUs in the age of generative AI across various industries and applications. Megaport ONE empowers businesses by streamlining the discovery, deployment, and management of essential compute and network resources for implementing AI and ML capabilities in enterprise solutions.

"Megaport's dedication to AI networking has always been evident through our industry-leading global platform. With Megaport ONE, we're taking this commitment further by delivering actionable insights derived from our proprietary AI and ML models, ushering in the era of predictive analytics," Reid explained.

"We are putting control firmly back into the hands of our users, allowing them to manage their cloud networks and computing resources seamlessly within a single, user-friendly platform designed to scale with them for years to come."
